

# Act Now!

A continuum of bullying prevention courses that support and enhance Positive Behavior Interventions and Supports, are game-based, and align with National Health Education Standards for grades K4 through 8.

## Student Outcomes

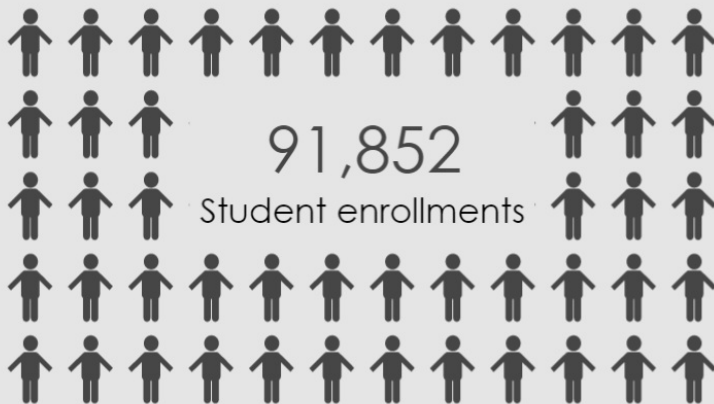

Students demonstrated statistically significant change. Here are some examples of their improvement:

**84%** of 4th grade students were able to identify positive bystander behaviors (an increase of 13%).

**87%** of 5th grade students were able to identify elements of cyberbullying (an increase of 11%).

**81%** of 8th grade students were able to identify ways to stop bullying in their school (an increase of 12%).

## Reach

## Educator Satisfaction

**98%** of educators using Act Now! felt their students learned valuable information that will lead to behavior change.

**99%** of educators using Act Now! reported they would recommend Children's Hospital's e-learning programs to their co-workers.

**86%** of educators using Act Now! reported the curriculum was age appropriate.

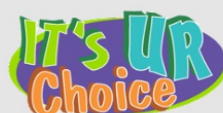

"[Students] really started to apply what they learned with the way they interacted with each other. I saw some of the strategies in play."

-7th Grade Educator
